

T-110.5220 Information Security and Usability

2nd assignment: Redesign Facebook
privacy management

2nd assignment

- Redesign the Facebook privacy management to better follow the usability principles presented in the Privacy lecture
- Pay attention to:
 - Privacy defaults
 - Privacy awareness
 - Access to privacy management
 - Usability of privacy management
 - Privacy needs currently not covered

2nd assignment

- Max 10 pages but this is not essential
- Start with a short analysis of the main issues of the current privacy management you are aiming to tackle
- Then describe your proposed solution with
 - Visualisations
 - Text
 - Charts
 - Combination of the above
 - As you see fit.

DL for 2nd assignment is 31.3.2010

- Send your assignment by 31.3.2010 23:59 to
- Kristiina.karvonen@hiit.fi
- With subject line "T-110.5220 second assignment"

Results of the 1st assignment

- Announced in Noppa by 12.3. 2010 12:00 with your student number and one of the following notes:
 - Pass + (so you pass with a good answer that can enhance your final grade)
 - Pass (you pass the assignment but this will not affect your final grade)
 - Not pass, get in touch with the lecturer (your assignment does not meet the course requirement, you will get instructions on how to correct it)

Next lecture 19.3.2010

- Guest lecture by
 - Ville Nore, Usability specialist & Maria-Helena Markkula, User experience manager, F-Secure
 - Will tell on the challenges on making usable security products
 - What features affect the design
 - How is the work done
 - Future developments

Don't miss it!!!
